

### Segment metrics vs multiplicity – $\gamma=3$ , hit drop 1% (fixed $\epsilon=2$ mrad)

**i) Segment efficiency  $N_{\text{true act}}/N_{\text{true all}}$**

ii) **Segment false rate**  $N_{\text{false act}}/N_{\text{active}}$ 

### iii) Segment-pair counts

**iv) Active segment pairs (solid true, dashed false)**
