T = 100 tracks
T = 400 tracks
T = 1000 tracks
PV efficiency (≥ 4 tracks)
fakes per event
z residual rms [μm]
primary vertices
primary vertices
primary vertices
vertex sampler, triplets (quantum, exact output)
vertex sampler, doublets (quantum, exact output)
focusing scan, as specified
focusing scan + refit
tracks (classical solver) + vertex fit
tracks (one-bit filter) + vertex fit
tracks (QSVT, degree 40) + vertex fit
truth tracks + vertex fit (bound)
