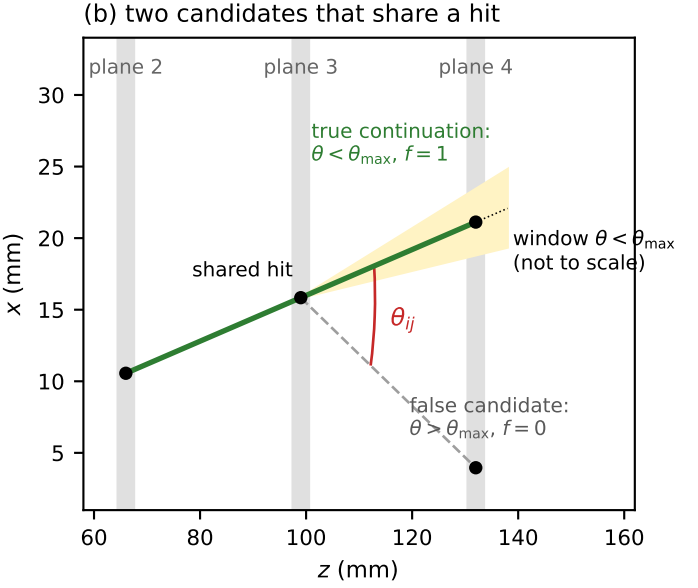
(a) candidate segments
plane 1
plane 2
plane 3
plane 4
plane 5
$S_i = 1$ (active)
isolated false segment: no compatible neighbour
vertex
$S_j = 0$ (inactive)
3 tracks, 36 candidate segments, 12 true
x (mm)
z (mm)



(b) two candidates that share a hit
plane 2
plane 3
plane 4
true continuation:
$\theta < \theta_{max}$, $f = 1$
shared hit
window $\theta < \theta_{max}$
(not to scale)
θ_{ij}
false candidate:
$\theta > \theta_{max}$, $f = 0$
x (mm)
z (mm)
