(a) segment efficiency
segment efficiency (%)
tracks per event T
classical solver
one-bit filter
QSVT, degree 40
(b) segment false rate
segment false rate
tracks per event T
classical solver
one-bit filter
QSVT, degree 40
(c) candidate segments
segments
tracks per event T
true segments
false candidates
(d) false segments kept
false segments kept
tracks per event T
classical solver
one-bit filter
QSVT, degree 40
true segments in the event (reference)
