

Section 14 Solver Segment Efficiency (1% hit drop) $\varepsilon = 2$ mrad, $\gamma = 3.0$, $\delta = 1.0$

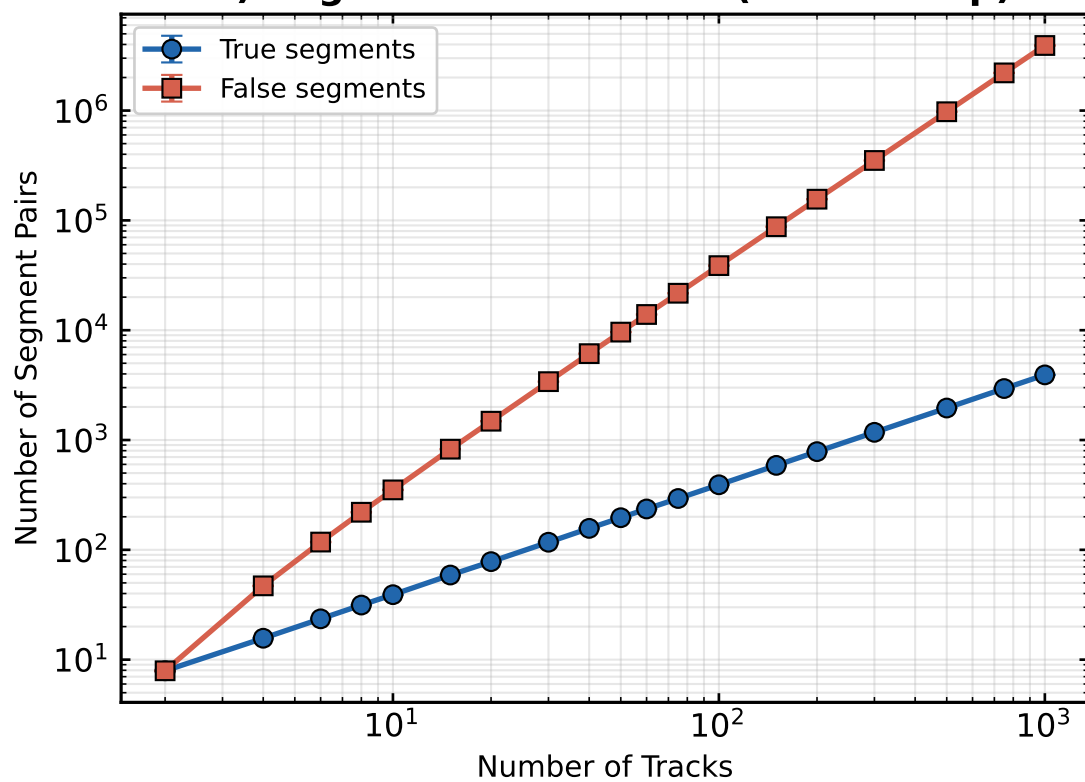

i) Segment Efficiency ($N_{\text{true act}}/N_{\text{true all}}$)

ii) False Rate ($N_{\text{false act}}/N_{\text{accepted}}$)

iii) Segment Pair Counts (1% hit drop)

iv) Active Segment Pairs (1% hit drop)
