

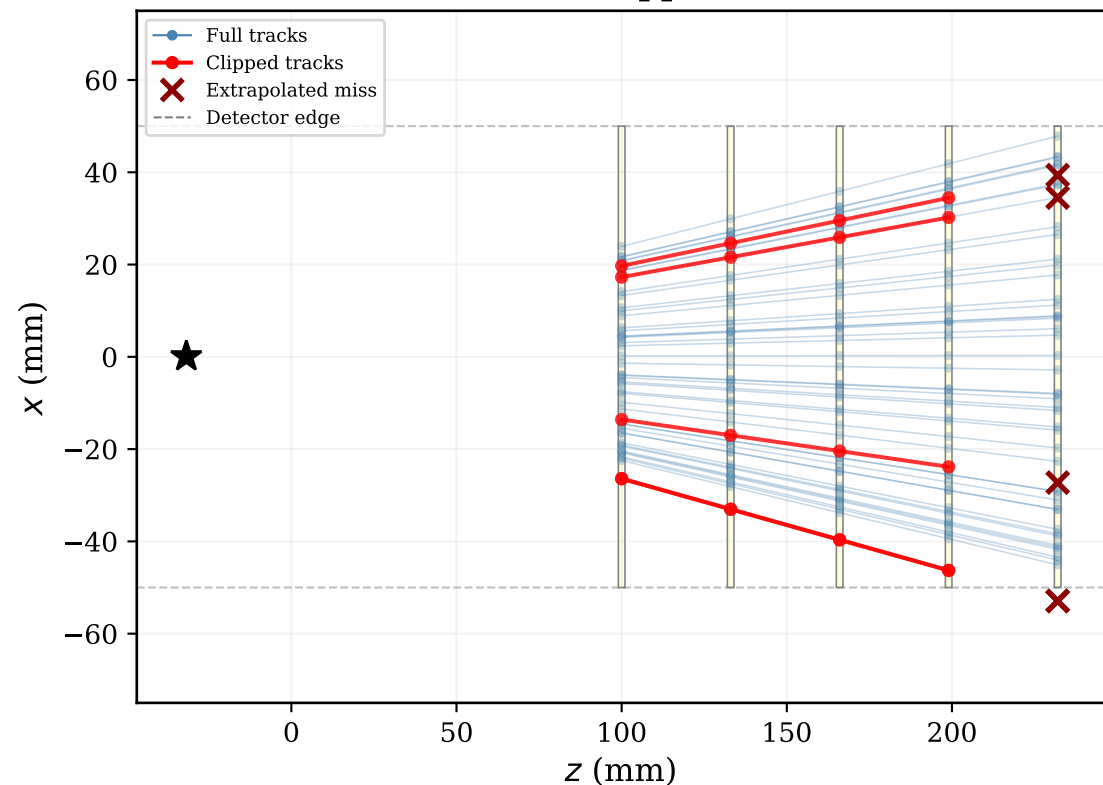

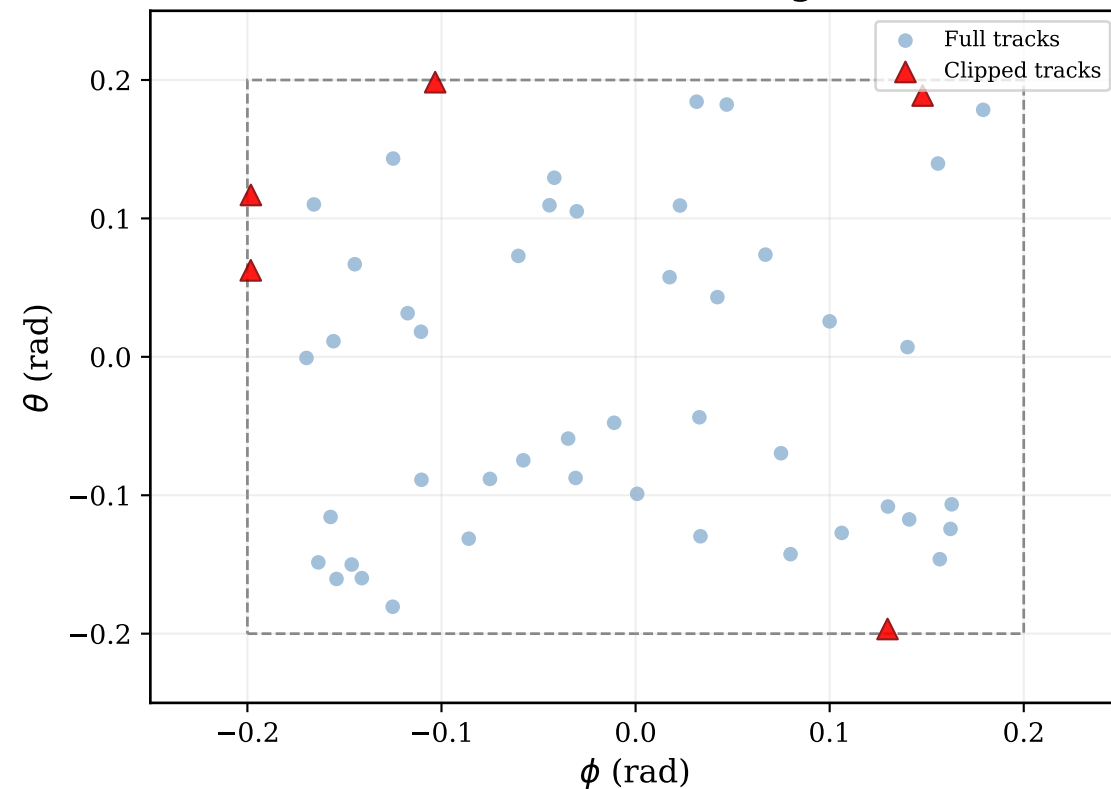

**Figure 4: Track-Level Diagnosis — Connecting Clipped Tracks to Occupancy Anomalies**

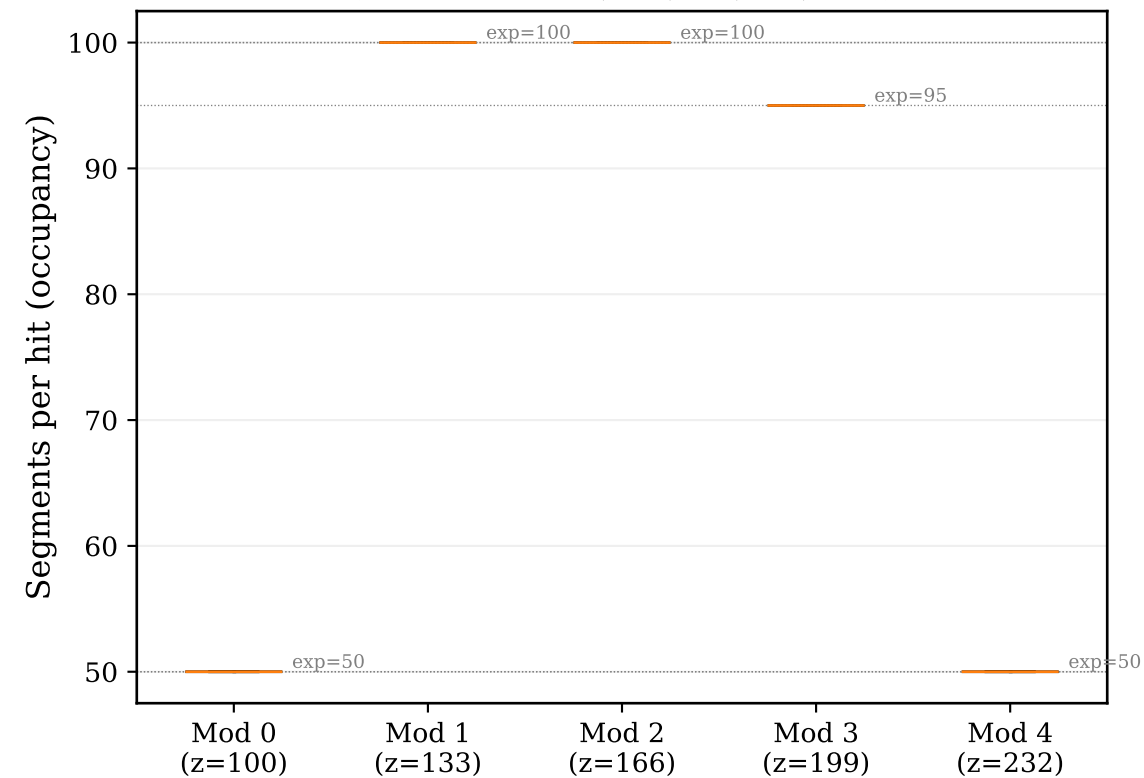

**(a) Event display — PV  $z = -31.8$  mm**  
**45 full + 5 clipped tracks**

**(b) Track angles — clipped tracks cluster at extreme angles**

**(c) Hit occupancy per module**  
**(hits/mod: [50, 50, 50, 50, 45])**

**(d) Overall occupancy histogram**  
**(red = anomalous sub-peaks from clipping)**
