QSVT comb on the pruned systems
T = 400
T = 1000
efficiency at false rate <= 1 %
false rate at 99 % efficiency
polynomial degree
polynomial degree
current comb, full matrix
comb weighted on surviving false lines, full matrix
current comb, decoupled dropped
comb weighted on surviving false lines, decoupled dropped
current comb, components < 3 dropped
comb weighted on surviving false lines, components < 3 dropped
